

UAV EXTRA4 FORMULA B 10W-40

B SERIES SPECIALTY ENGINE OIL

DESCRIPTION:

Full-synthetic, ester-based engine oil designed for use in high-performance single and multi-cylinder engines running either leaded or unleaded fuel. Jointly developed with leading unmanned aircraft manufacturers, the unique formulation combines a synergistic blend of exotic esters, regenerative polymers and the world's most advanced additive system to deliver increased horsepower, optimum engine cleanliness and excellent antifoaming characteristics. Robust anti-wear system extends engine life by reducing wear in both flat tappet and roller element engines. Exceeds all known OEM requirements and the requirements of API SL.

FEATURES & BENEFITS:

- Jointly developed with leading unmanned aircraft manufacturers
- Optimized for use in 4-cycle engines running leaded fuel
- Extended protection in highly loaded turbo and supercharged engine systems
- Shear stable, regenerative polymers maintain oil viscosity and film thickness
- World-class, proprietary additive system and esters combine to virtually eliminate oxidation and wear
- Surface-active chemistry aggressively attaches to engine surfaces and keeps them clean

APPLICATIONS:

For high-performance single and multi-cylinder engines running either leaded or unleaded fuel. Not recommended for street use.

TECHNICAL DATA

SPECIFICATION	TEST METHOD	10W-40
APPEARANCE	VISUAL	Amber
VISCOSITY @ 40°C (cSt)	D445	93.1
VISCOSITY @ 100°C (cSt)	D445	14.9
VISCOSITY INDEX	D2270	168
FLASH POINT (°C)	D92	228
POUR POINT (°C)	D97	-48
DENSITY @ 15 °C (g/ml)	D4052	0.893
