

# OFF-ROAD COOLANT

# RACING ENGINE COOLANT

## DESCRIPTION:

High performance coolant designed to reduce and maintain lower operating temperatures, minimize power loss due to heat and prevent damage from excessive temperatures. Developed with top Trophy Truck and Class racers, Off-Road Coolant has been tested and proven in the harshest and most extreme environments. Premium ethylene glycol and pure deionized water are combined with an advanced additive system to provide ultimate protection against rust, corrosion, cavitation and foaming while providing water pump and seal lubrication for steel, aluminum and magnesium engines.

## FEATURES & BENEFITS:

- Premixed with pure, deionized water for optimum performance and convenience
- Developed with top Trophy Truck and Class racers
- Enables maximum horsepower by controlling engine temperatures
- Advanced formulation protects against rust, corrosion and cavitation
- 100% biodegradable in unused form
- Specially designed for use in steel, aluminum and magnesium engines

## APPLICATIONS:

For high performance use. Ready-to-use formulation requires no mixing. Offers minimal freeze protection and should not be used at temperatures below 15°F.

## TECHNICAL DATA

SPECIFICATION	TEST METHOD	RESULTS
APPEARANCE	VISUAL	Blue
DENSITY (g/cm <sup>3</sup> )	D5931	1.020
FREEZE POINT (°C)	D1177	-9.4 (15.0°F)
BOILING POINT (°C)	D1120	104.0 (219.2°F)
BOILING POINT (°C)	22 psi cap	140.7 (285.2°F)
